

KS3 Geography Learning Journey

In Geography, we identify powerful knowledge across a range of physical and human geography topics. We equip students with a wide range of skills, including numerical, investigative and literacy skills. The topics we study help to increase students' cultural capital and enable them to develop a wider understanding of the world and its diversity. This will support students to become well-informed members of society and will enable them to participate in an ever-changing labour market.

Potential career pathways include:

Data analysis

Conservation

Cartography

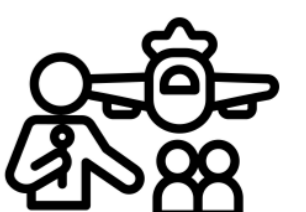

Climatology

Seismology

Town planning

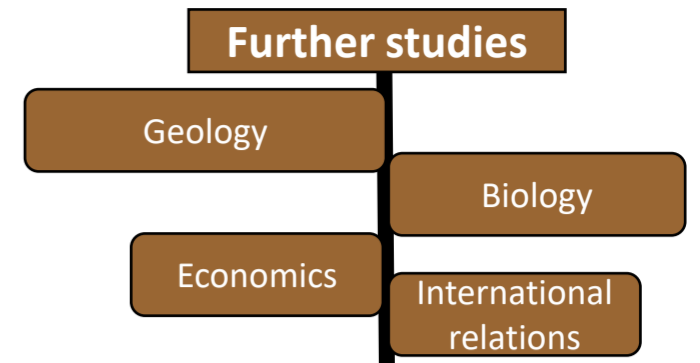

Tourism

The East Manchester Academy

KS4 Geography Learning Journey

In Geography, we identify powerful knowledge across a range of physical and human geography topics. We equip students with a wide range of skills, including numerical, investigative and literacy skills. The topics we study help to increase students' cultural capital and enable them to develop a wider understanding of the world and its diversity. This will support students to become well-informed members of society and will enable them to participate in an ever-changing labour market.

Consolidation of knowledge and skills

GCSE Exams

Assessment point

Pre-release/geographical applications

Coastal landscapes

Assessment point

Human study – New Islington

The Living World

Sustainable energy schemes

Assessment point

River study - Crowden

YEAR 11

Fieldwork

Assessment point

Changing economic world

Resource Management

Rio de Janeiro

Assessment point

Nigeria

River landscapes

Assessment point

Urbanisation

Manchester

Assessment point

Key

Paper 1: Physical

- Natural hazards (including tectonics, weather hazards and climate change)
- The living world (rainforests and cold environments)
- Physical landscapes in the UK (rivers and coasts)

Paper 2: Human

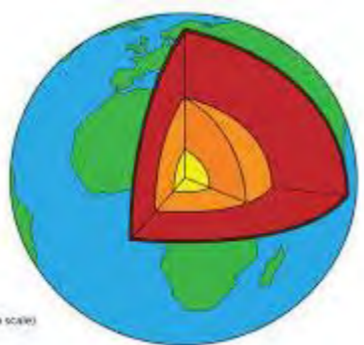

- Urbanisation (Rio and Manchester)
- Changing economic world (development gap, Nigeria and UK economy)
- Resource management (energy)

Paper 3: Geographical Application

- Pre-release
- Unseen fieldwork
- Familiar fieldwork

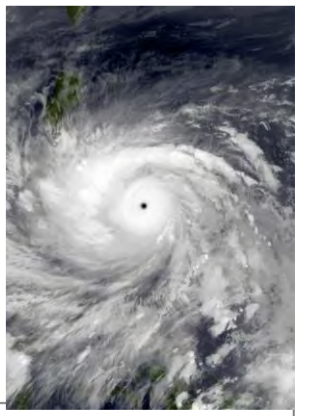

YEAR 10

Natural hazards – tectonic hazards

Chile and Nepal earthquakes

Natural hazards – weather and climatic hazards

Typhoon Haiyan

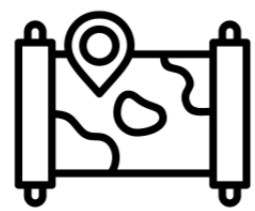

Potential career pathways include:

Data analysis

Conservation

Cartography

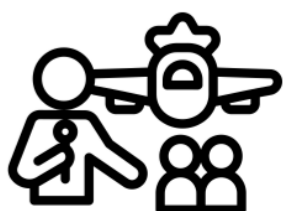

Climatology

Seismology

Town planning

Tourism
